

**LETTER FROM  
THE PRESIDENT**

**Rafael Latorre, DVM, PhD**

Dear Friends and Plastinators,

It is with great pleasure that I present to you Volume 33, Issue 1, of the Journal of Plastination. Thanks to the authors of the papers for choosing our journal to publish their work. I would also like to thank the reviewers for taking the time to review the manuscripts.

On behalf of the International Society for Plastination (ISP) I would like to thank all of you who participated in the first ISP Online Interim Meeting (April 26-29<sup>th</sup>, 2021). I would like to thank the efforts made by the Organizing Committee. There were many hours of coordinated work to get everything ready.

On behalf of the Organizing Committee, I want to express my gratitude to the speakers, thank you for your effort and commitment to our Society. During these three days, you have transmitted new ideas to apply in our labs, and you have facilitated new collaborations between our labs. You have highlighted in a very clear way the different applications of plastinated specimens, giving the participants many new ideas to increase the tremendous potential of plastination as a tool in our anatomy teaching and research activity.

ISP members can use your password to access the private area of our website; we will use it for all our discussion topics, and new information such as the videos of this international meeting.

Remember also that we have an appointment ahead, our next International Conference that will be hosted by the Universidad de La Frontera, Temuco, Chile, in July 2022, with Dr. Nicolás Ottone as the main organizer.

I would like to welcome all new members of the International Society for Plastination, and to invite all of you to participate in the Journal of Plastination. Please, share with us your results, your expertise in plastination, and other anatomical techniques.

Thank you very much and I hope to see you all in Chile next year.

With best regards from Murcia, Spain

Rafael Latorre  
**ISP president**
