

Editors Comment:

From time to time, we receive suggestions, comments, and complaints about ISP Journal and Society happenings.

At one particular institution, Departments are infighting over control of Plastination and its uses. Per Dr. von Hagens agreements with institutions that are plastinating, specimens cannot be re-sold for use. This is both unethical and illegal.

Please be aware that wrongful practices are taking place throughout some hallowed halls of wisdom and we as a Society should condemn these occurrences.

We the editors of the ISP Journal wish everyone the Merriest of Holidays and a Great New Year plastinating!
